Network Security Declaration

Center: Orlando's OCCC (075) - FL

Show:

ASI SHOW 2018

Company Name:

Booth / Room #:

Customer / Ref #: 2018 - 075 - 517

The Network Security Policy implemented for this Facility requires Customer(s) adherence to several necessary precautions in order for Smart City to maintain a healthy, viable network for all Customers. This declaration of compliance with the security requirements as noted herein is an acknowledgement of Smart City's filtering policies and must be completed, signed by an authorized Customer representative and mailed or faxed to Smart City prior to the requested network service(s) being activated for Customer's usage.

Network Security Policy:

Smart City requires that all devices directly or indirectly accessing Smart City's network(s) have the latest virus scan software. Windows® security updates, system patches, and any other technological precautions necessary to protect the Customer(s) and others from viruses, malicious programs, and other disruptive applications. Any device(s) which adversely impacts Smart City's network(s) may cause service interruptions to Customer(s) which can lead to disconnection of the Customer's equipment from the network(s), with or without prior notice at Smart City's sole discretion. The device(s) in question will remain disconnected until all issues are adequately resolved. All charges will apply and no refunds will be given. Additional charges may apply for trouble diagnosis and / or problem resolution.

Smart City has implemented filtering policies on all Internet routers. These filters block all inbound Internet Control Message Protocol (ICMP) -- Ping, Traceroute, etc. -- destined to any Smart City Network(s). Smart City understands that Ping and Traceroute are valuable troubleshooting tools; therefore Smart City's Policy does allow ICMP (Ping & Traceroute) packets sourced from any Smart City network(s).

Further, to avoid infection by common Internet worms (Nachi, MSBlaster, LoveSAN, etc.), Smart City has implemented similar filters on the following TCP and UDP port numbers: UDP - 137, 138, 402, 1434 and TCP - 135, 139, 402, 445, 4444.

Customers requiring inbound or outbound access to any of the filtered ports, should contact a Smart City customer service representative in advance of the event with details of the specific requirements so that Smart City may consider the potential of a customized alternative.

Each Customer's business is important to Smart City and with advanced and timely notification of a Customer's needs we are confident that we can provide network services that perform as expected for all clients.

- Please inform all show site personnel about the importance of Smart City's Network Security compliance issues ***
- Services are activated after Smart City is in receipt of this signed declaration of compliance with our network security requirements ***

With execution of this document the Customer hereby attests that Customer provided equipment, which will be connected to Smart City's network(s) at the above noted Facility and Show / Event has been properly protected, contains anti-virus software, and the latest patches and security updates have been installed. Customer(s) also accepts the responsibility for the performance of Customer's equipment and understands the conditions placed on service delivery by this document as well as the potential that additional charges may be incurred should Customer's equipment be found to adversely impact Smart City's network(s) performance. The Customer acknowledges that this Network Security Declaration is part of the Customer Contract allowing Smart City to provide requested service(s) and is subject to change without notice.

Overview

Smart City is the exclusive provider for wired and wireless services for the Facility and has in operation a comprehensive wireless 802.11 a / g / n network. Smart City operates multiple Cisco wireless networks utilizing over 1000 access points throughout the Orange County Convention Center. Smart City can engineer custom dedicated network(s) to achieve your company objectives. Please contact us at (888) 614-2637 to discuss your network design.

Pay-Per-Day Products

- 2.4 GHz 802.11 g / n: Complimentary basic Wi-Fi® available in the Facility's public space. For business class speeds utilizing a 2.4 GHz network Instant Internet (up to 512 Kb) is available as an on-site pay per day service in the Facility's public space.
- 5 GHz 802.11 a / n: Exhibitor Internet (up to 1.5 Mb) is available as an on-site pay per day service in all areas of the Facility including the Exhibit Hall, Meeting Rooms and Public Space. 5 GHz wireless adaptors are available for purchase on-site at the Smart City Service Desk or by calling Smart City at (407) 685-2000.
- Wireless speeds and accessibility depend on the wireless environment in a local area.

Custom Wireless Networks

If you require wireless 5 GHz access for application demonstrations, Smart City is able to build a custom 5 GHz wireless network in your booth. Please call Smart City at (888) 614-2637 for a custom wireless quote.

Internal Networks

Smart City is the exclusive provider of all voice, wired and wireless data services. Wireless Devices not authorized by Smart City are strictly prohibited. Smart City requires all Customers showcasing their wireless products to contact Smart City 21 days prior to the show move-in so that we may engineer a cohesive network operating without interference (all approvals will incur a Wireless Engineering Management Fee). Please provide Smart City with the make and model of your wireless router for network approval (wireless access points without adjustable power outputs cannot be authorized under any circumstances). Wireless devices need to be programmed on-site following Smart City guidelines.

Customer Acceptance

Wireless service is inherently vulnerable to interference from other devices that transmit similar radio frequency signals or that operate within the same frequency spectrum. Smart City does NOT recommend wireless service for mission critical services such as presentations or product demonstrations that can accept a wired CAT5 connection. Per our Terms and Conditions listed on Smart City's Customer Contract, misuse of any wireless service may result in service interruption to yourself or other Customers and can lead to disconnection of the Customer's equipment.

ALL WIRELESS ACCESS POINTS NOT AUTHORIZED BY SMART CITY ARE PROHIBITED.

I hereby attest that I understand the limitations and vulnerabilities of the wireless service provided by Smart City. I also understand that if I use this service for any reason including, but not limited to, demonstrating, showcasing or presenting my product(s), Smart City will not be responsible for possible interference that I may experience. Upon receipt of the completed Smart City Contract, Smart City Services will be activated / available for your use.

Floor Plan – Communications Cable

Center: Orlando's OCCC (075) - FL

ASI SHOW 2018

Show:

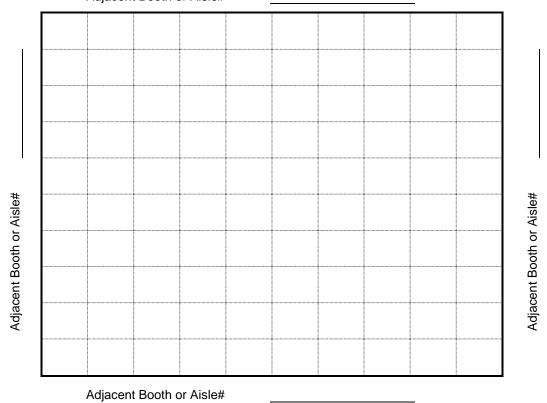

Company Name:

Booth / Room #:

Customer / Ref #: 2018 - 075 - 517

Voice and Data communications cabling. Smart City is the **exclusive installer** of Voice and Data communications cabling. Smart City provides cabling to booths, within booths (under carpet and flooring) and from booth-to-booth. Fiber Optic, twisted pair (Category 3, 5 and 6), coaxial and all other data and telecommunication cable fall under Smart City's area of expertise.

IMPORTANT!! Prior to installation of service, a complete floor plan is required. Please utilize this grid should you not have your own floor plan to send us. You may use a different floor plan for each service group (Telephone, Internet, etc.) or combine all services on one floor plan. For a floor plan to be considered complete it **must** include all the information listed below (Main Distribution Location "MDL", designated location of items within the booth, surrounding booths, scale-length and width).

Adjacent Booth or Aisle#

A = Main Distribution Location (MDL) – The originating line(s) for service, whether from overhead, a floor pocket or a column, will be delivered to a "MDL" before being distributed within your booth. Example: Storage area, back of booth, etc. (unless specified, the default for the "MDL" will be the back of the booth or at Smart City's discretion, the most convenient location). All distribution of services to their final destination within the booth will originate from the "MDL". A per line move fee will apply to relocate services within your booth after they have been engineered and / or installed.

I = Location of Telephones, Fax lines or other telecommunications equipment "**T**".

I / H / PC / C = Location of primary Internet Service "I", Hubs "H", Patch Cables "PC" and / or Computers "C". For Smart City to perform your floor work, you will need to indicate the location of each item you want cabled. Make sure to order your floor work, hubs, and patch cables early and in advance of the show moving in.

Orientation = The Booth or Aisle #'s surrounding your booth. A minimum of one surrounding Booth or Aisle # is required (two or more would be more helpful) for Smart City to accurately install your services.

Size = Booth dimensions (example 10x10) ______. Scale = 1 Box is equal to ______ ft.
